

Middle School Academic Framework

ST PETERS
GIRLS

Throughout the Middle School, teachers create learning experiences which are guided by the principles of our Academic Framework. Whether being taught an Australian Curriculum subject or an experience from one of our unique Signature Programs or Elective Subjects, students are encouraged to develop and reflect upon the key skills of:

- Self-Management
- Communication
- Collaboration
- Inquiry and Reflection
- Creative and Critical Thinking

As they navigate the early adolescent landscape, and in preparation for Senior School, we work with our students to develop a crucial set of attributes, enabling them to be:

- Versatile
- Ethical
- Curious
- Engaged
- Empowered
- Motivated

By skilful differentiation, the use of diverse assessment tasks, delivery of rigorous and relevant content, and expert understanding of subject-specific knowledge and skills, our teachers ensure students are supported and stretched as they progress through the Middle School.
